# BESPOKE PACKAGING

---

Brand representation is vital; the packaging is the first thing the consumer will see and feel, the starting point that sets your product and company apart.

With our digital diecutting machine, and along with inhouse digital print & laminating capabilities we can help you create original designs to showcase your product and brand.

We can utilise our stock range and personalise for you. For example: using one of our stock boxes and creating a card or foam insert to house the product, we can then logo print the lid if required. Or get creative with cardboard engineered packaging a unique, one of a kind design to really make your product pop!

Prototypes/one off packaging; a great way to introduce and enhance your product for the marketplace, or for a sales pitch.

No need for large scale commitment until you are ready for production...

and we are more than happy to do small runs, cost effectively!

Please contact us to see how we can help,

We would love to work with you on your project!
